

Attr_Minut: Link travel time in minutes

Length: Link length in miles

Volume_Fro: Link volume (# of vehicles) from the selected critical zones

ChgTravTim: Change in overall travel time in minutes for evacuating vehicles from selected zones when the corresponding link is disrupted

ChgTravLen: Change in overall travel length in miles for evacuating vehicles from selected zones when the corresponding link is disrupted

IsolatedBG: Number of BGs that lost access to evacuation routes and isolated due to the link disruption/closure

EvaVehlsBG: Number of potential evacuating vehicles in BGs that lost access to evacuation routes and isolated due to the link disruption/closure

AvgSVI: Average Social Vulnerability Index of the BGs that use the corresponding link for evacuation

AvgLandVal: Average appraisal values of the BGs that use the corresponding link for evacuation

AvgFloodAr: Average percentage of lands with high risk of flooding in the BGs that use the corresponding link for evacuation

Zone: The zone in which the evacuating vehicles that use the link are located

Measure: The criticality measure used to identify top critical links
